Levers and Knobs

Levers and Knobs
Brass Levers and Knobs

Finger clearance is defined as the clearance between the lever and the base of the rose or plate at the centre of the lever. The tables below are calculated using an assembled plate/rose thickness of 12.5mm. Due to different bearing bush, the projection and finger clearance of levers in the 4800/5800 Series is 2.5mm larger than the value shown (except Lever 90).

For use on the following door furniture series:

- 1220 Series
- 1420 Series
- 1360 Series
- 1370 Series
- 1800 Series
- 2800 Series
- 4800 Series
- 5800 Series
- Artefact Series II Furniture
